EDUCATION

- **University of Central Florida** Orlando, FL
Bachelor of Science in Mathematics, Minor in Computer Science Aug 2020
- **Valencia College** Orlando, FL
Associate of Arts, Honors, Phi Theta Kappa Honors Society Aug 2014

EXPERIENCE

- **JPMorgan Chase** Tampa, FL
Software Engineering Intern June 2020 – Aug 2020
 - Worked alongside a team of full-time employees on JPMorgan's Code For Good Project
 - Built a Networking and Training web app for a Financial Literacy nonprofit
- **Knight Hacks @ UCF** Orlando, FL
Vice-President / Secretary / Director of Public Relations / Hackathon Organizer Aug 2017 – May 2020
 - Held workshops on various technical topics, such as coding practice, using git, and Android Studio
 - Planned technical career development workshops and mentored students, among various other responsibilities
- **IZEA** Winter Park, FL
Associate Software Quality Assurance Engineer Intern Sept 2019 - Dec 2019
 - Automated UI/Web application testing using Ghost Inspector, JavaScript, and JQuery, and created a dashboard of graphs and visualizations for the automated test results, using Splunk
- **CDK Global** Seattle, WA
Software Engineering Intern Jun 2019 - Aug 2019
 - Worked on the Digital Advertisement Platform team as a full-stack engineer and built an internal web app that currently serves as a data transparency tool
 - Technologies used included Java, Spring Boot, and Maven for the backend, Angular / Typescript for the front end, JUnit for Unit testing
- **CDK Global** Seattle, WA
Software Engineering Intern Jun 2018 - Aug 2018
 - Worked on backend code in Java 8 to build a tool that automated the process of submitting customer lead data to sales associates
 - Utilized J2EE, Spring 5, JDBC, JUnit 5, Oracle SQL, Maven, Agile

PROGRAMMING SKILLS

- **Languages, Frameworks, and Other Technical Skills:**
 - Java, Spring Boot, JUnit, SQL, Python, C, Ruby, JavaScript, TypeScript, Angular, HTML, CSS, L^AT_EX
 - Bash, Git, IntelliJ, Android Studio, Linux, Agile, Kanban

PROJECTS

- **CorgoConnect:** Contact management website, built using LAMP stack - features Register New User, Login/Logout with Authentication, Add/Edit/Delete contact, Search functionality. I personally implemented the front end using Bootstrap, JavaScript for connecting backend/front end, and JQuery.
- **Lancelot Project:** Open source Discord bot in Node.js created to help manage Knight Hacks' discord server and to provide a community project students can contribute to.

- **KnightHacks 2017:** Implemented the UI and front-end development for a BAC calculator app in Android Studio, and contributed Java code in a collaborative project with a team.
- **Various personal projects, including a personal website:** Projects include a website (lienne.github.io), a CSV parser in C, and various algorithm projects - all up in github.com/lienne
