EXPERIENCE

- **CDK Global** Seattle, WA
Software Engineering Intern *Jun 2018 - Aug 2018 / Jun 2019 - Aug 2019*
 - Summer 2018: Worked on back-end code in Java 8 to build a tool that submits/resubmits data pulled from a database. Utilized J2EE, Spring 5, JDBC, JUnit 5, Oracle SQL, Maven, Agile.
 - Summer 2019: Ongoing project - Data Transparency Tool utilizing Spring Boot for back-end and Angular for front end.
- **SightPlan** Orlando, FL
Software Engineering Intern *March 2019 - May 2019*
 - Wrote a load test script in JMeter for QA to test our Answering Service system
 - Worked on backend using Ruby and Ruby on Rails
- **Tech Knights @ UCF** Orlando, FL
Vice-President / Formerly Director of Public Relations / Secretary / Hackathon Organizer *Aug 2017 - June 2018*
 - Hold workshops on various technical topics, such as coding practice, using git, and Android Studio
 - Help in organizing and setting up events such as interview preparation and resume building
 - Keep accounts up-to-date with newest information on club meetings, workshops, and events
 - Mentor younger students and new members of the club

PROGRAMMING SKILLS

- **Languages:**
Proficient in: Java, C
Working Knowledge of: Python, Ruby, Matlab, C#, JavaScript, HTML, CSS, L^AT_EX
- **IDE's and Other Technical Skills:**
Bash UNIX shell, Git, IntelliJ, Android Studio, Eclipse, Netbeans, Code::Blocks, MS Office, Linux, VirtualBox VM, Agile, Mac OS
Limited Knowledge of: Amazon Web Services

EDUCATION

- **University of Central Florida** Orlando, FL
Bachelor of Science in Mathematics, Minor in Computer Science *May 2020*
 - A solid mathematical basis enables me to quickly adapt to diverse and emerging technologies. I've truly enjoyed the applied side of my degree, solving problems logically and discovering new techniques.
- **Valencia College** Orlando, FL
Associate of Arts, Honors, Phi Theta Kappa; Exiting GPA: 3.6 *Aug. 2014*

PROJECTS

- **CorgoConnect:** Simple contact management website, built using LAMP stack - features Register New User, Login/Logout with Authentication, Add/Edit/Delete contact, Search functionality. I personally implemented the front end using Bootstrap, JavaScript for connecting backend/front end, and JQuery.
- **KnightHacks 2017:** Implemented the UI and front-end development for a BAC calculator app in Android Studio, and contributed Java code in a collaborative project with a team.
- **HackRiddle 2017:** Deployed the website to host a live coding application written in collaboration with a team, using the Python language.
- **Various personal projects, including a personal website:** Projects include a website (lienne.github.io), a CSV parser in C, and various algorithm projects - all up in github.com/lienne
