## EDUCATION

- **University of Central Florida** — Orlando, FL
  *Bachelor of Science in Mathematics, Minor in Computer Science* — *May 2020*

- **Valencia College** — Orlando, FL
  *Associate of Arts, Honors, Phi Theta Kappa* — *Aug 2014*

## EXPERIENCE

- **IZEA** — Winter Park, FL
  *Associate Software Quality Assurance Engineer* — *Sept 2019 - Present*
  - Currently automating UI/Web application testing using Ghost Inspector, JavaScript, and JQuery

- **CDK Global** — Seattle, WA
  *Software Engineering Intern* — *Jun 2019 - Aug 2019*
  - Worked on the Digital Advertisement Platform team as a full-stack engineer and built an internal web app that currently serves as a data transparency tool
  - Technologies used included Java, Spring Boot, and Maven for the backend, Angular / Typescript for the front end, JUnit for Unit testing

- **SightPlan** — Orlando, FL
  *Software Engineering Intern* — *March 2019 – May 2019*
  - Wrote a load test script in JMeter for QA to test our Answering Service system
  - Worked on backend services using Ruby and lightly touched on Ruby on Rails

- **CDK Global** — Seattle, WA
  *Software Engineering Intern* — *Jun 2018 - Aug 2018*
  - Worked on backend code in Java 8 to build a tool that automated the process of submitting customer lead data to sales associates
  - Utilized J2EE, Spring 5, JDBC, JUnit 5, Oracle SQL, Maven, Agile

- **Knight Hacks @ UCF** — Orlando, FL
  *Vice-President / Director of Public Relations / Secretary / Hackathon Organizer* — *Aug 2017 – Present*
  - Held workshops on various technical topics, such as coding practice, using git, and Android Studio
  - Planned technical career development workshops and mentored students

## PROGRAMMING SKILLS

- **Languages, Frameworks, and Other Technical Skills**:
  - Proficient in: Java, Spring Boot, SQL
  - Working Knowledge of: Python, C, Ruby, JavaScript, TypeScript, Angular, HTML, CSS, LaTeX
  - Bash, Git, IntelliJ, Android Studio, Eclipse, Netbeans, Code::Blocks, Linux, VirtualBox VM, Agile

## PROJECTS

- **CorgoConnect**: http://corgoconnect.com/ - Simple contact management website, built using LAMP stack - features Register New User, Login/Logout with Authentication, Add/Edit/Delete contact, Search functionality. I personally implemented the front end using Bootstrap, JavaScript for connecting backend/front end, and JQuery.
- **Lancelot Project**: Open source Discord bot in Node.js created to help manage Knight Hacks' discord server and to provide a community project students can contribute to.
- **KnightHacks 2017**: Implemented the UI and front-end development for a BAC calculator app in Android Studio, and contributed Java code in a collaborative project with a team.
- **Various personal projects, including a personal website**: Projects include a website (lienne.github.io), a CSV parser in C, and various algorithm projects - all up in github.com/lienne
